

Installation Features

Wall-Mount Installation

Mounts on left or right side of door. No rails to hang, it simply mounts on the wall and attaches to the garage door torsion bar. Unit requires an electrical outlet within 6 feet.

Patented Absolute Positioning Technology

The newest technology in garage door openers, our patented design allows the electronic limits to be extremely accurate, even after a power failure.

Exclusive! The Smart Garage Door Opener®

Lets you electronically program additional remotes or a keyless entry from the motion-detecting control panel or the powerhead.

Quick-Connect™ Terminals

Push-in wiring for quicker installation.

6-Foot Power Cord

Makes connecting to a power source easier than ever.

Push Button Limit Settings/Automatic Force Sensing

Allows for faster setup. Auto-force feature constantly monitors garage door system and adjusts forces to temperature fluctuations, floor height and door track movement.

Optional Accessories

EverCharge™ Battery Backup System

After the power goes out, the battery backup system will operate the garage door opener for 20 full cycles within a 24-hour period.** Remote light remains off and audible signal will sound to alert the homeowner that power is out and battery backup is in use.

**Fully charged batteries at 72°F.

Model 475LM

Additional Remote Lights

Add as many lights as you wish. All lights can be turned on and off by opener activation or control panel light button.

Model 380LM

Laser Garage Parking Assist

The high-tech solution that helps you park perfectly in your garage! As you pull into your garage, the laser is activated and projected onto your dashboard, making it easy to park in the same spot every time.

Model 975LM

Wireless Keyless Entry with Security+®

Open your garage using a secure access code and close with just the push of a single button. Also set temporary entry codes for friends and service people.

Model 377LM
